About the app

App Bandit lets you find any app on any app store in the world, whether it's the iOS App Store, Google Play Store, Chrome Web Store, or just a website. For any app you can quickly see its price, platforms, in-app purchases, screenshots, and learn more about the app. App Bandit also lets you upload your own personal apps to it, so that everyone can see your beautiful work of art!

Frequently Asked Questions

Why should I sign up to be a member?
As a member, you can basically do everything that non-members can do, PLUS you will be able to post comments for each app. So that makes you much cooler than non-members.

How do I create an account?
Click the Sign Up button that is on the top right of every page. Do it.

What is a moderator?
Moderators are what we like to call "Comment Masters" because they decide what comments to edit, delete, and reply to. Moderators are allowed to delete any comment they feel is inappropriate except for the comments that are posted for their personal app. That would just be unfair.

How do I become a moderator?
One the home page there is a button you could press called "Become a Moderator" – just fill this out, and we'll see if we can make you a moderator.

Can I become an Admin?
Yes, but only if you're chosen to be one by another admin.

How do I submit an app?
To submit an app just click the submit app button in the navigation bar. Fill out the details, and that's it! We'll review it and if all goes well, it'll go up on the site.

Can I submit my own app?
Of course! Just submit it like any app, and check the "I'm the creator" box so that we know you made it.

How do I find apps?

You can browse through all the apps from the home page, or search/filter/sort to your heart's content from the search bar.

Someone is trolling hard. Can I delete comments on forums?

If you're a moderator, yes. If you're not, don't worry the moderators will get to it. No troll zone.
